Roll. No	UID No.	Name of the Student	Theory Question	Coding Question			
1	23BSD002	ANSARI AAFIYA	Analyze the time complexity of searching an element in an unsorted array.	Write a program to implement a stack using an array.			
2	23BSD003	ANSARI SANUBI MEHAK	Classify Data Structures with proper examples.	Write a program to create a singly linked list and display the elements in reverse order.			
3	23BSD004	ASHAR SAHIL	Classify Data Structures with proper examples.	Write a program to implement stack operations:Push,Pop,Display,Exit			
4	23BSD005	BAGAL BHAKTI	Define Abstract Data Type (ADT) and list its advantages.	Write a program to implement selection sort.			
5	23BSD043	FADTARE HARIT	Write the algorithm to evaluate a postfix expression.	Write a program to perform inorder, preorder, and postorder traversals of a binary tree.			
6	23BSD006	FURTADO DERRICK	Define Algorithm. Why is algorithm analysis important in programming?	Write a program to search an element in a singly linked list and display whether it is found or not.			
7	23BSD007	GHADI SAHIL	Describe step-by-step conversion of A + B * C - D /E - F into postfix and prefix.	Write a program to search an element using sequential (linear) search.			
8	23BSD008	GUJRATI NIYAMA	Describe the algorithm to copy one linked list into another linked list.	Write a program to implement Hash Table with Linear Probing.			
9	23BSD010	JANGALAGI GAGAN	Differentiate between Linear Probing, Quadratic Probing, and Double Hashing with examples.	Write a program to insert and delete a node in a binary search tree.			
10	23BSD011	KADAM VEDANT	Discuss at least three applications of Graphs in real-world problems.	Write an algorithm to merge two sorted linked lists into one.			
11	23BSD012	KALYANWALA AMMAR	Explain AVL Tree rotations with diagrams.	Write a program to implement a circular queue.			
12	23BSD044	KAPADIA BUSHRA	Write the algorithm to convert infix expression to postfix expression.	Write a program to evaluate a prefix expression using stack.			
13	23BSD013	KAPADIA TOOBA	Write a program to perform DFS and BFS Traversal of a graph.	Write a program to convert and evaluate A+B*(C^D-E) into prefix form.			
14	23BSD014	KHAN SHAMOON	Explain Big O, Big Theta, and Big Omega with examples.	Write a program to check for balanced parentheses using stack.			
15	23BSD015	KHAN SULEMAN	Explain Collision Resolution Techniques in detail with examples. Implement a program for Linear Probing.	Write a program to implement the Tower of Hanoi problem using recursion.			
16	23BSD016	KHATU SHRUSHTI	Explain Deletion and Rehashing in Hash Tables. Why is rehashing necessary?	Write a program to insert an element into a max-heap and min-heap.			
17	23BSD017	KHATU SHRUTI	Explain deletion in a one-way linked list. Describe deletion at the beginning, at the end, and at a given position with exa	Write a program to merge two sorted arrays into a single sorted array.			
18	23BSD018	KHOKHAR AAMATULLAH	Explain how the World Wide Web can be represented as a dynamic graph. Discuss its applications.	Write a program to implement merge sort.			
19	23BSD019	MALKANI SARAH	Explain Kruskal's algorithm with an example to find Minimum Spanning Tree.	Write a program to implement a queue using linked list.			
20	23BSD020	MEHER DAPAN	Explain operator precedence and associativity rules with examples.	Write a program to implement queue operations:Insert,Delete,Display,Exit			
21	23BSD021	MODI SAHIL	Explain searching in a two-way linked list with an example.	Write a program to implement a priority queue using array.			
22	23BSD022	NANDU JIYA	Explain Sparse Matrix with its memory representation.	Write a program to create a tree and display its elements.			
23	23BSD023	PAL RITESH	Explain stack applications with an example of expression evaluation.	Write a program to perform BFS and DFS traversal on a graph.			
24	23BSD025	PESHWANI KASHISH	Explain the difference between a circular queue and a normal queue with use cases.	Write a menu-driven program to read two arrays, merge them, and display the elements in sorted order.			
25	23BSD026	PINTO JOYLENE	Explain the difference between Data and Information with examples.	Write a program to search an element using binary search.			
26	23BSD027	PRADHAN PEEHUL	Explain the difference between infix, prefix, and postfix expressions with examples.	Write a program to insert a node at the beginning of a singly linked list.			
27	23BSD045	RAINA PANKAJ	Explain the difference between singly linked list, circular linked list, and doubly linked list.	Write a program to perform Heap Sort on an array.			
28	23BSD028	RAJAK SACHIN	Explain the role of Data Structure in compiler design (scanning, parsing, lexical analysis, symbol table).	Write a program to implement bubble sort.			
29	23BSD030	SAWANT SWAYAM	Explain the role of stacks in converting infix expressions to postfix expressions.	Write a program to take user input as infix expression and display both its postfix and prefix conversions.			
30	23BSD033	SHAIKH SAKINA	Explain the terms: Time Complexity and Space Complexity with suitable examples.	Write a program to construct a binary tree.			
31	23BSD034	SHEIKH SAHIBA	Explain traversal in a circular linked list with an algorithm.	Write a program to implement insertion sort.			
32	23BSD035	SIDDIQUE MARIYAM BAN(	How do data structures support compiler design? Explain the role of data structures in scanning, parsing, lexical analys	Write a program to perform inorder, preorder, and postorder traversals of a binary tree.			
33	23BSD036	SIDDIQUI MOHAMMED AL	Illustrate the concept of "Rate of Growth" using graphs and explain how it relates to Big O notation.	Write a program to implement a deque (double-ended queue).			
34	23BSD037	SIKAKUL SHUBHAM	What are Spanning Trees? Differentiate between Minimum Spanning Tree (MST) and Spanning Tree. Write Kruskal's Al	Write a program to generate the adjacency matrix for a graph.			
35	23BSD038	SINGH DIVYA	What are the common operations performed on data structures? Explain any four operations with examples.	Write a program to implement collision resolution using chaining (hashing).			
36	23BSD039	TEJANI PRAKRUTI	What is a circular linked list? How is it different from a singly linked list? Give examples of its applications.	Implement a universal converter: take any expression type (infix/prefix/postfix), detect its type, and convert it to all three forms.			
37	23BSD040	TELI RONIT	What is Bucket Hashing? Explain its advantages and disadvantages with an example.	Write a program that converts infix to postfix without using recursion, handling all precedence and associativity rules (including ^ operator).			
38	23BSD041	TOPALA GAUSIA	What is Hashing? Explain different Address Calculation Techniques with suitable examples.	Write a program to check whether a given infix expression has balanced parentheses before conversion.			
39	23BSD046	MUSKAAN	Write a detailed note on Common Hash Functions with examples. Which is the most efficient and why?	Write a program to convert and evaluate ((A+B)*C-D)/(E+F) in postfix form.
